

BIN CLEANING

- Truck-mounted hot wash
- All contaminants and waste water are captured on the truck and taken away for environmental disposal
- Bins disinfected and deodorized
- Risk and method statement available

BIN CHUTE CLEANING

We are sure that you already know that the buildup of residual waste on the bin chute walls can lead to increased fire risk, along with foul odours and pest infestation.

Our bin chute cleaning system is specifically designed for residential tower blocks and apartments. Here's how it works:

- Hot water / steam & detergent delivered at 3,000 psi will deliver a clean, deodorized and disinfected bin chute
- **Waste water, oil, grease and debris are captured in the bin room and taken away for environmental disposal**

BIN CHUTE MAINTENANCE

DO YOU HAVE A
**CERTIFICATE OF
MAINTENANCE**
FOR YOUR BIN
CHUTE HOPPERS?

Bin chute fires are common and are caused by a number of different factors, but the most common cause is from improper disposal of items such as cigarettes and matches falling into basement bins. **Reducing the risk of smoke from entering residential areas can be life saving.**

Contact us to arrange on-site smoke testing/repair and/or replacement of hopper smoke seals. We can also carry out the following:

- Hopper Inspection & Testing
- Hopper Smoke Testing
- Closure Plate Servicing
- Compliance Certification
